Indiana's employment is expected to grow by 302,600 jobs between 2004 and 2014, according to the latest projections from Indiana's Department of Workforce Development. This is a growth rate of 10 percent with employment increasing from 3,056,560 in 2004 to 3,359,170 by 2014. Another 742,160 job openings are anticipated to replace retirees and others departing from the workforce. Indiana's occupational projections include a display of occupations along with the most common educational attainment required and the median wages earned for each occupation. It is clear that most of the fastest growing occupations require greater education and are the highest paying jobs. All of the educational attainment groups requiring a degree have a median annual wage of more than \$42,000, and thesejobs are expected to grow at double-digit rates. All jobs that require no post-secondary education are expected to grow a rate below 10 percent.
